AIA and Engineering Continuing Education Programs

R.I. Lampus Company offers a variety of luncheon seminar programs for all architectural design professionals and engineers. For AIA-Registered Architects, each program offers one Learning Unit and one HSW credit. To have a luncheon seminar at your facility, please contact George Snyder to schedule your program choice.

Permeable Interlocking Concrete Pavements: ICPI 000003

- Learn how to select PICP's.
- Compare the different types of exfiltration options, and how they apply in different situations.
- Principals of hydrological and structural design.
- The components of a specification for PICP construction.
- Maintenance requirements for PICP's.

Segmental Retaining Walls - Construction Processes: NCMA 0510

- The components of an SRW system.
- Types of retaining wall products available.
- Importance of soils and geo-synthetic reinforcement.
- How to properly install an SRW.
Including: field information, excavation, bearing pad preparation, drainage, reinforcement, capping, and grading.
- Special applications such as radius walls, terraced walls and railings.
