- 11 Whole Country Stone
- 2 Cut Country Stone
- 2 Split Country Stone

**ROW 9:**

- 11 Whole Country Stone
- 2 Cut Country Stone
- 2 Split Country Stone

**ROW 10:**

- 12 Whole Country Stone
- 3 Cut Country Stone

ROW 11:

- 10 Whole Country Stone
- 5 Cut Country Stone

**ROW 12:**

- 1 Cut Pice Angle Iron
- Water Fall Unit

**ROW 13:**

- 20 Whole Omni-Vintage 750
- 3 Cut Omni-Vintage 750

**NOTES:**

- Water feature should be built on a level concrete base
- It is recommended the blocks are bonded with masonry adhesive
- Blocks that appear darker and Caps that appear lighter represent cuts
Specific measurements will vary per installation
- The six splits for the inset accent can be split from 3 blocks
These blocks can be a similar color to the caps to add contrast to the accent
- Some Country Stone on the top course will need to be ground down to allow room for the angle iron to sit level with the top of the block
- The three Country Stone in the front on the top row will need to be cut to size to allow the water fall kit to fit level under the caps
- This guide is designed to work around a Color Falls Water Fall Kit
Consideration should be made for any power supply needed
