890 lbs. / unit  
1 unit / pallet

36" x 20" x 12"  
660 lbs. / unit  
1 unit / pallet

## LAYING PATTERNS

Convex Curves:  
Minimum radius: 20 ft.  
Best fit radius: >30 ft.

Note: Minimum radii shown are based on an average mix of block lengths. Actual radius will depend upon block placement.

Due to the setback between courses of blocks (2.25 inches per course), the radius of convex curves will get smaller towards the top of the wall. It is recommended that you plan your base course layout accordingly due to the tapered ends of the upper courses becoming tighter. The overall radius will decrease as the wall is constructed.

# GEOSTONE

## PALLET OVERVIEW

24 units / pallet  
24 sq. ft. / pallet  
2 layers / pallet  
1,920 lbs. / pallet

## SPECIFICATIONS

18" x 12" x 8"  
80 lbs. / unit  
1 unit / sq. ft.  
1/2 cu. ft. / per core  
4.5' minimum radius

## CORNER DETAILS

A corner takes 1.5 blocks per course to make. The first block is split in half. Take care to make sure this split is made at exactly the halfway point so that the other half can be used on the next course's corner.

On the second block, measure all the way to the point where the inside of the core starts to make its turn. This is where a cut is necessary in order to fit snug against the machined edge of the other piece of the corner. The length of the piece to be cut off should be 3" (the same as the width of the split edge on the half block).

# CROSS SECTIONS

## PAVERS: INTERLOCKING PAVEMENT INSTALLATION

NOTE:

1. THICKNESS OF AGGREGATE BASE WILL VARY WITH SUBGRADE CONDITIONS AND CLIMATE. COLDER CLIMATES MAY REQUIRE THICKER BASES.

## PERMEABLE PAVERS: PARTIAL EXFILTRATION INSTALLATION

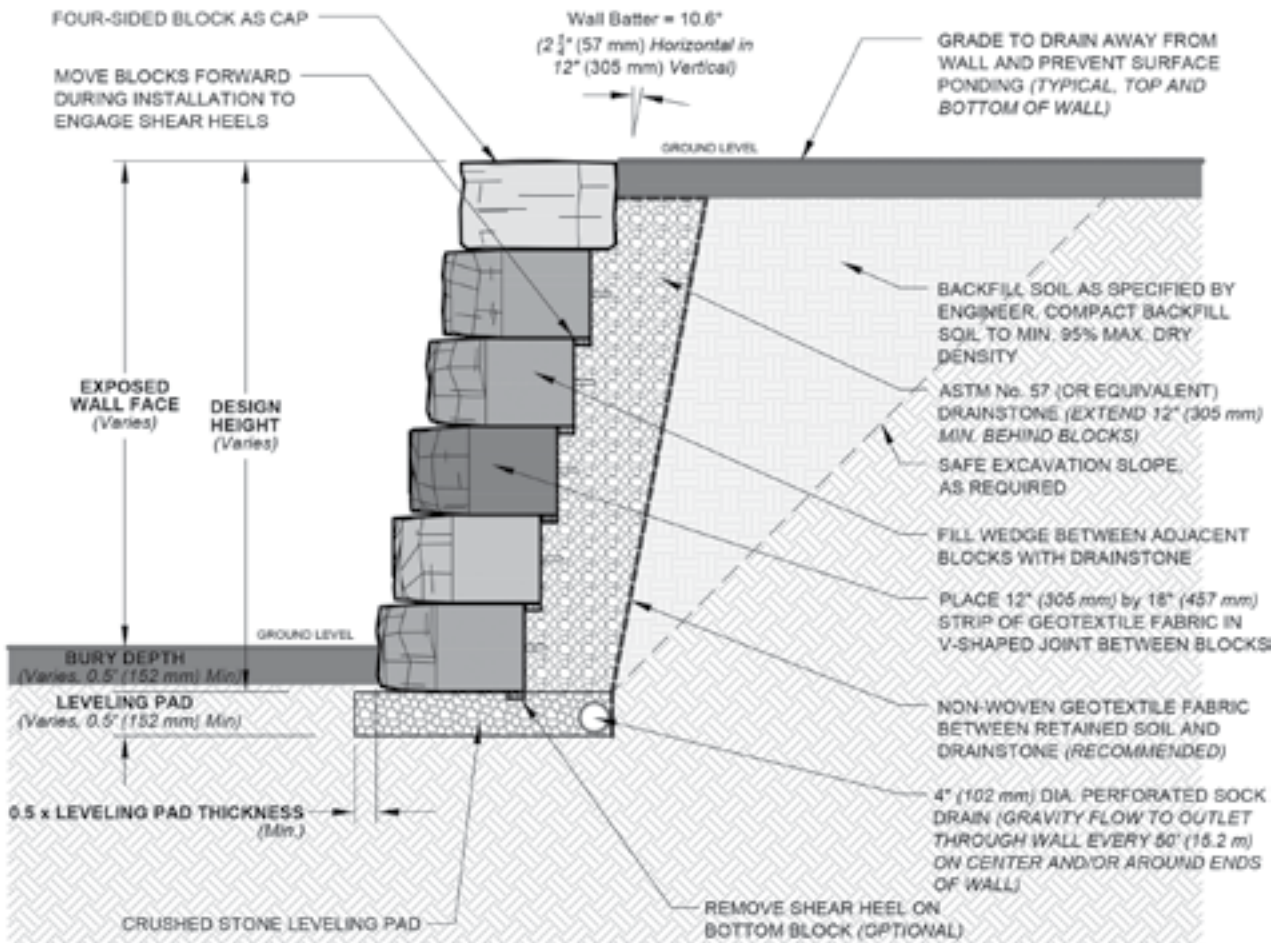

*Partial exfiltration through the soil subgrade. Perforated pipes can be raised above the soil subgrade to drain water from higher depth rainstorms. Smaller storms which often contain higher pollutant concentrations can be captured below the perforated pipes, stored and infiltrated.*

## VERSA-LOK® STANDARD: REINFORCED INSTALLATION

## ROSETTA® GRAND LEDGE: GRAVITY INSTALLATION

# PRODUCT WARRANTY

R.I. Lampus Company guarantees that all dry-cast wall and paving stone products meet or exceed the requirements of ASTM C-1372 for walls and ASTM C-936 for paving stones. This warranty is limited to the original purchaser for residential applications installed and maintained according to R.I. Lampus Company installation guidelines or industry standards. Damage sustained as a result of improper installation or design, chemical application, excessive loading, or other misuse is expressly excluded from this warranty. Should any dry-cast product prove defective, it will be replaced without cost. Replacement labor and shipping costs are not included in this guarantee. Proof of purchase is required. Retain the warranty tag with batch information for all claims.

R.I. Lampus Company specifically disclaims any warranty relative to color, color consistency, or texture due to natural material variations. Color matching of any replacement units cannot be guaranteed. Efflorescence, a white deposit, common on concrete and masonry surfaces, is a natural occurrence and no warranty or liability is expressed or implied for this condition.

Wet-cast products, including Rosetta® Hardscape Products, are backed by a lifetime warranty from the manufacturer to the original end user for products used in residential applications. This assurance of product quality is applicable where products have been correctly installed to manufacturer's specifications or industry standards. Any properly installed hardscape material that deteriorates due to the concrete in the product not meeting the design strength specification will be replaced by the manufacturer of the product. Replacement labor and shipping costs are not included in this guarantee. Proof of purchase is required. Retain the warranty tag with batch information for all claims. The following items are not covered by this warranty: color variances and the appearance of surface stains resulting from chemical reactions such as efflorescence or differential curing, damage caused by installation, deterioration caused by de-icing salts or fertilizers, damage resulting from sub-grade settlement or movement, hairline cracks that do not affect the structural performance of the products, spalling of less than three percent of the surface area, contact with chemicals or paint, discoloration due to airborne contamination, staining, oxidation, or improper sealing.

## COLOR DISCLAIMER

The colors of products shown in print are to be used as representations or guidelines only. The photographic and printing processes are not fully capable of reproducing exact colors of all products. Colors may also change from production run to production run. All products are not warranted as always available in all locations, and R.I. Lampus Company may change, amend, add, or discontinue any product shape or color at the sole discretion of R.I. Lampus Company with no prior notification. Not all colors are available in all shapes. Check with the sales department for availability.

To assure random color distribution, it is recommended that individual blocks be mixed from different pallets on the job site. Actual product colors may vary slightly. We recommend that products be viewed at your local distributor location. Special order colors are available upon request.

## PRODUCT MAINTENANCE

The face of retaining walls can be stained due to mineral and moisture laden soil in the backfill area as well as from the environment. Cleaners and sealers are available for routine wall maintenance.

Cleaners and sealers are available for surface enhancements and protection when necessary. Any concrete products used for stair tread applications may require a protective sealant to resist adverse effects of de-icing agents.

Snow can be shoveled or plowed from pavers as readily as other pavements. High strength, low absorption R.I. Lampus Company pavers are more resistant to de-icing salts than ordinary concretes, but they can still be damaged by intense applications. Sealers will help to protect the surface.
