

FIRE PIT/FIREPLACE INSERTS

PRODUCT GUIDE

FIREPLACE INSERT

OPENING: 33" WIDE X 24" HIGH X 24" DEEP

This heavy duty fireplace insert is made of 1/4" thick carbon steel with black powder coating. It features a rectangular flu support suitable for several different liner sizes, as well as a built in extended smoke chamber for increased chimney "draw" to evacuate smoke quickly and efficiently. It also has an integral double lintel that allows for blocks to "bridge" the fireplace opening without using additional steel or grinding. Each insert comes with a carbon steel log rack.

FIRE PIT INSERT

24" DIAMETER FIRE PIT

30" DIAMETER FIRE PIT

42" DIAMETER FIRE PIT

27" SQUARE FIRE PIT

These heavy duty fire pits are made of 1/4" thick carbon steel with black powder coating, making them incredibly durable and long lasting. Each fire pit has a decorative steel top ring, 3 removable legs and a drain grate. These inserts are designed to work as a protective liner for Lampus products (like Castlerok® and Versa-Lok®) but can also be used independently.

30" DIAMETER FIRE PIT

This heavy duty insert fire pit insert is made with 1/4" thick uncoated carbon steel with a lip around the top that rests directly on the top course of block.
