

FIRE PIT INSERTS

PRODUCT GUIDE

STANDARD ROUND INSERTS

24" DIAMETER

30" DIAMETER

42" DIAMETER

These heavy-duty fire pits are made of $\frac{1}{4}$ " thick carbon steel with black powder coating, making them incredibly durable and long-lasting. Each fire pit has a decorative steel top ring, 3 removable legs, and a removable drain grate. These inserts are designed to work as a protective liner for Lampus products (like Castlerok® & Versa-Lok®) but can also be used independently.

SQUARE INSERT

27" SQUARE

"DROP-IN" ROUND INSERT

30" DIAMETER

Just like the Standard Round Pits, the 27" Square Fire Pits are made of $\frac{1}{4}$ " thick carbon steel with black powder coating, making them incredibly durable and long-lasting. They come with a decorative steel top ring, 4 removable legs, and a removable drain grate. These inserts are designed to work as a protective liner for Lampus products (like Country Stone) but can also be used independently.

This "Drop-In" insert is made with $\frac{1}{4}$ " thick uncoated carbon steel with an integral lip around the top that rests directly on the top course of block, requiring no bottom support. These inserts are one piece and easy to install. They can be built in or added post construction to extend the life of your Lampus products.
